

WHY NO DIGITAL ID?

Is the human experience a robotic one?

Digital identity
cannot accommodate
your true, loving,
spiritual reality.

(Although it can play a role
in a system that denies that
and denies you are anything more
than what can be digitised).

Digital identity
cannot accommodate
everything about you
that cannot be digitised.

It can only accommodate-
and assimilate- the indicators of you
that are effectively so un-human
as to be robotic. Computer data.

Which would be fine
if it didn't claim to represent you
more than your humanity.
If the indicator wasn't a usurper.

Or if those implementing it
weren't going to treat you as such-
reducing what it means to be human to a spiritless droid.
And you just know that's what's going to happen...

Because it happens now, already.
Just as the bit of paper that proves that you are you
is somehow- in a mad world- more real than you are.
All part of the progression...that yes, has already been happening a long time.

And since it does (reduce you to a spiritless droid...),
it must be avoided at all costs.
We cannot accommodate it. Not least because it
cannot accommodate us.

We cannot accept such replacement
for our true spiritual reality- divinity- truth
and Real Identity as Spirit having
human experience on Earth here.
